

# SYSTEM PERFORMANCE MEASURES REPORT

## PROMPTS

FFY 2017

Below are the recommended prompt values for the FFY 2017 reporting period for the System Performance Measures reports and accompanying data quality reports. All 0700-series should be run by CoC Code; data quality reports may be run, as appropriate, by provider during the clean-up period, but should be run by CoC Code for all reviews.

*Note: date prompts are pre-populated for all reports, so unless you need to run prior year data, you can assume these are correct!*
